OCTOBER, 2025

The Vitalist Declaration

01 Life & health are good.
Death is humanity's core problem & aging its primary agent.

02 Aging causes immense suffering & obviating it is scientifically plausible.

03 Humanity should apply the resources to reach freedom from aging.

04 We should apply ourselves to reach unlimited healthy lifespans.

05 I will carry the message against aging & death.

The Oprah Winfrey Show

Dr. Marty Makary
FDA COMMISIONER

"There is new research now showing that the aging process may be reversible"

FOX, Nov. 2024

Jim O'neill
HHS: DEPUTY SECRETARY

"I'm best suited to work on the biological side of giving people more options by escaping at first temporarily and at some point indefinitely from this unfortunate fact of aging."

"It will become routine for people to go into a clinic maybe every 5 years.. get hooked up to a machine for a few hours, get a lot of junk cleaned out of their bloodstream ...and just repeat that process every 5 years and **stay young and vigorous, indefinitely**. It is going to happen.. the only question is when, and I'm trying to make the when sooner rather than later."
